CTPL Registration must be completed prior to requesting SFTP account.

1. Request SFTP access via the Contact Us form on the [ctpaidleave.org](http://ctpaidleave.org) website.
2. Upon receipt of request, CTPL SFTP Admin will create the SFTP account for the TPA.
3. Once the SFTP account is set up, TPA will be notified and can test connectivity.
4. Send sample enrollment file to test connectivity. Schema provided by CTPL Admin.

1. Access [ctpaidleave.org](http://ctpaidleave.org)
2. Click on “**Contact Us**” from the top navigation menu.
3. Complete **all form fields**.
4. Select “**Request SFTP Access**” from the ‘**Contact Reason**’ dropdown menu.
5. In the ‘**How can we help you field?**’ enter the reason for SFTP request
6. Click ‘**Submit**’.

## >Connecting to SFTP Server Step-by-Step for Manual Upload

1. Once you have received your SFTP login credentials please point your web browser to:  
<https://sft.ct.gov>
2. Please enter the username and password you have been provided from the CTPL SFTP admin  
(sent via secure email)

ct.gov ST Web Client

## > Connecting to SFTP Server Step-by-Step for Manual Upload

3. Once logged into the SFTP Web Client, you can drag and drop your files onto the web page.
4. Once your files have been uploaded, you can log out.

In order to ensure that files used by CTPL and our business partners can be quickly identified and properly archived and retrieved, it is requested that the following file naming conventions be followed. Failure to adhere to these standards could result in delays or failures processing inbound files.

Each file exchanged with the CT Paid Leave Authority will be expected to adhere to the following naming pattern. The pattern consists of a series of informational nodes, with each node separated by an underscore. The nodes have been chosen to allow providers or consumers to understand the expected file contents at a glance, and the consistency of node sequences will allow the files to stay organized within a normal folder structure. Additionally, automated processes may key off of file names, so an inconsistently named file may require special handling and incur processing delays.

Table 1 – File Naming Pattern

Node Content	Value	Sample
Unique Prefix for Paid Leave	CTPL	CTPL
Three Character Mnemonic for filetype.	See Table 2	ENR
Unformatted FEIN or some other identifier value, padded out to 9 characters	The Sender FEIN for files inbound to the authority, or for outbound files, the receiver FEIN.	426092234
A two character designator to indicate If this is a revised file.	For Original Files, this value will be 00. Increment this number for revisions or resubmissions.	00
Timestamp Unformatted. If a revision, the original version timestamp.	yyyymmddhhmmss	20210112152238
Period as the separator between filename and filetype	Standard Filenaming Convention	.
Standard Filetype suffix	Standard Filetypes	xml

Using the sample values from Table 1, the filename created would be :

CTPL\_ENR\_426092234\_00\_20210112152238.xml

Indicating that this is an XML Enrollment file sent by FEIN 42-6092234 on 01/12/2021 @ 3:22:38 PM.

Table 2 – Defined File types

File Type	Mnemonic
<b>Enrollment</b>	ENR
<b>Return</b>	RTN
<b>Acknowledgment</b>	ACK

## Special Note for Developers

As a convenience to organizations testing connectivity and file formats, the Authority has enabled a feature to allow files to be processed and validated without updating the backend system. Any file ending in `_test` or `_TEST` will execute validation steps ONLY and will produce an ack file per the typical flow but will NOT persist values.

As an example, file `CTPL_ENR_426092234_00_20210112152238.xml`, if renamed `CTPL_ENR_426092234_00_20210112152238_test.xml` can be used for testing without performing the data changes associated with processing an enrollment file.

## > Enrollment File - XML

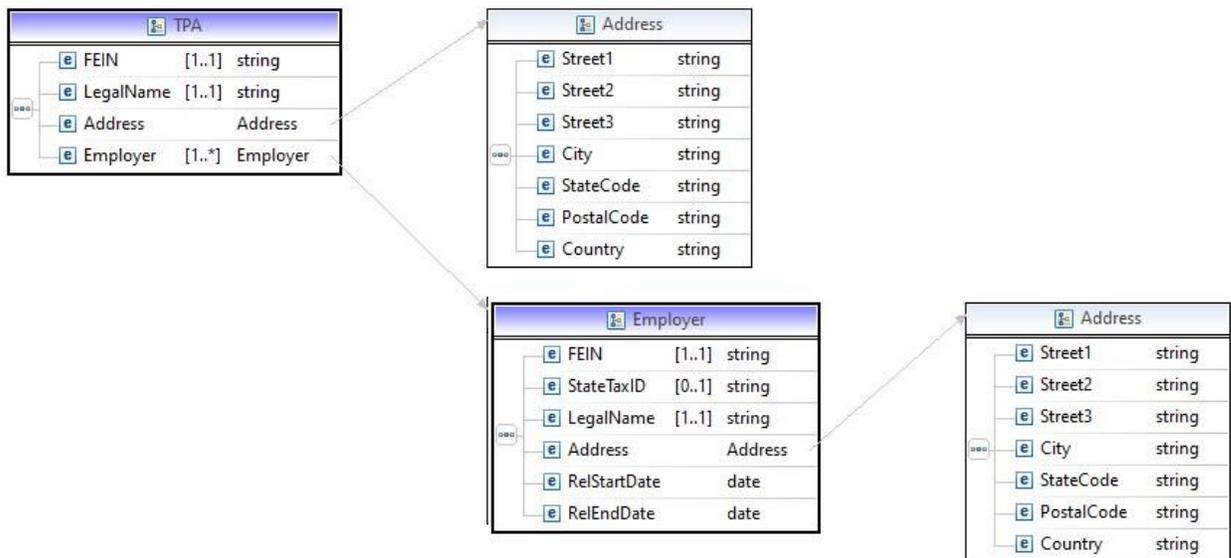

Format: XML

Frequency: Monthly

**Purpose:** The Enrollment file conveys the association between a given Third Party administrator and the Companies the TPA provides services to. The file requires Federal Employer Identification Numbers (FEIN) as identifiers for the participating companies and records the starting and potentially ending dates of the company to company relationships. For active relationships, no ending date will be supplied.

    <tns:Street1>Your Street Address</tns:Street1>
    <tns:Street2>Optional Address Info</tns:Street2>
    <tns:Street3>Optional Address Info</tns:Street3>
    <tns:City>Your City</tns:City>
    <tns:StateCode>CT</tns:StateCode>
    <tns:PostalCode>06016</tns:PostalCode>
    <tns:Country>USA</tns:Country>
  </tns:Address>
  <tns:Employer>
    <tns:FEIN>55-5136907</tns:FEIN>
    <tns:StateTaxID>876543200</tns:StateTaxID>
    <tns:LegalName>Client Company</tns:LegalName>
    <tns:Address>
      <tns:Street1>Their Street Address</tns:Street1>
      <tns:Street2>Optional Address Info</tns:Street2>
      <tns:Street3>Optional Address Info</tns:Street3>
      <tns:City>Their City</tns:City>
      <tns:StateCode>CT</tns:StateCode>
      <tns:PostalCode>06111</tns:PostalCode>
      <tns:Country>USA</tns:Country>
    </tns:Address>
    <tns:RelStartDate>2019-10-02</tns:RelStartDate>
    <tns:RelEndDate></tns:RelEndDate>
  </tns:Employer>
</tns:TPA>
```

Note that Employers will repeat \* times

If the relationship is Active, there will be no end date for RelEndDate

## > Enrollment File - CSV

**Format:** CSV

**Frequency:** Monthly

**Purpose:** The Enrollment file conveys the association between a given Third Party administrator and the Companies the TPA provides services to. The file requires Federal Employer Identification Numbers (FEIN) as identifiers for the participating companies and records the starting and potentially ending dates of the company to company relationships. For active relationships, no ending date will be supplied.

While the preferred format for Enrollment Files are XML, this Alternate CSV format can be used by Payroll Processors who, for some reason, cannot work with XML.

### File Layout:

The File will contain each named field separated from the next by a comma. Strings containing commas must be enclosed in double quotes. All other strings may optionally be enclosed in double quotes.

The file will contain a header record. The record layout follows, but is shown vertically rather than horizontally for ease of readability:

Header	Sample Value	Datatype
TPAFEIN	39-4313328	string
TPALegalName	Third Party Administrator	string
TPAStreet1	Your Street Address	string
TPAStreet2	Optional Address Info	string
TPAStreet3	Optional Address Info	string
TPACity	Your City	string
TPAStateCode	CT	string
TPAPostalCode	06016	string
TPACountry	USA	string
EmplyrFEIN	55-5136907	string
EmplyrStateTaxID	876543200	string
EmplyrLegalName	Client Company	string
EmplyrStreet1	Their Street Address	string
EmplyrStreet2	Optional Address Info	string
EmplyrStreet3	Optional Address Info	string
EmplyrCity	Their City	string
EmplyrStateCode	CT	string
EmplyrPostalCode	06111	string
EmplyrCountry	USA	string
EmplyrRelStartDate	2019-10-01	date
EmplyrRelEndDate		date

Within Each Return File submitted, the fields prefixed with TPA must be identical on each record. There will be a unique set of values for the set of fields prefixed with Emplr. That will create a file with the record count equal to the number of Client Companies (Employers) being enrolled.

As our process will first convert the CSV format to XML, it is important that these constraints be strictly adhered to.

## > Acknowledgement File

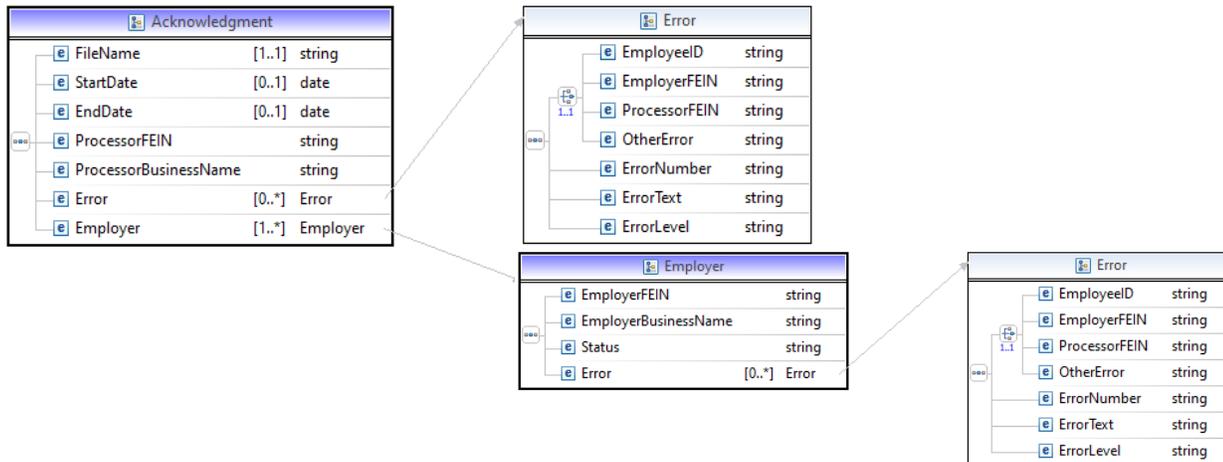

Format: XML

Frequency: Monthly

**Purpose:** The Acknowledgement file is used to communicate processing results for Enrollment files or Return Files back to the submitter. It will document the status of the submitted file after processing and communicate any processing errors encountered.

## Graphic View

      <tns:EmployeeID></tns:EmployeeID>
      <tns:ErrorNumber></tns:ErrorNumber>
      <tns:ErrorText></tns:ErrorText>
      <tns:ErrorLevel></tns:ErrorLevel>
    </tns:Error>
  </tns:Employer>
</tns:Acknowledgment>
```

Errors can occur at several levels. In this acknowledgement, a non-conforming file format was encountered.

## > Return File

Format: XML

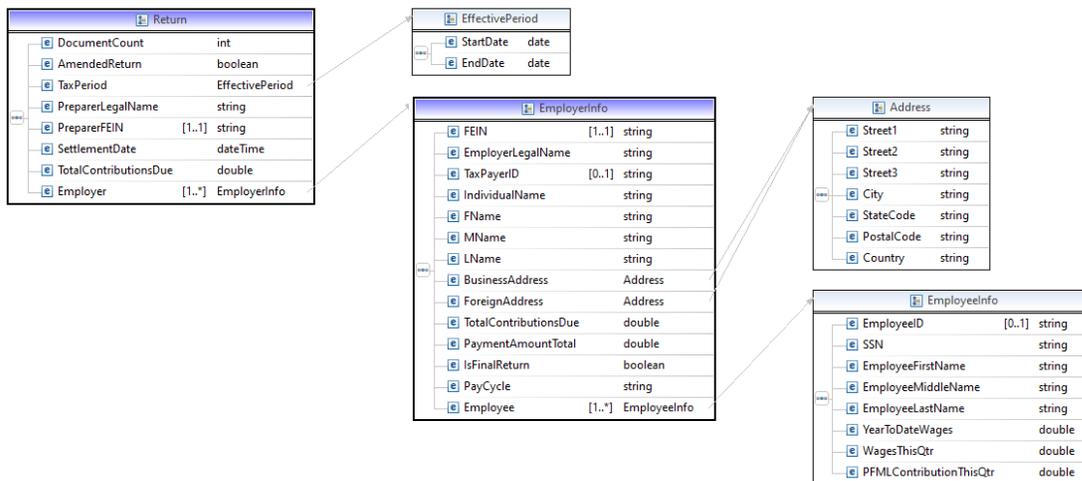

Frequency: Quarterly

**Purpose:** The Return File will convey information about contributions made on behalf of Employers, itemized down to the Employee Level. It will be submitted by Payroll Providers, who's return will consist of multiple Employers. Returns will be reviewed at the employee level and accepted or rejected at the Employer level.

# > Return File
